

[SB 6254](#) would have regulated vapor products by banning all flavored vapor products, vapor products with vitamin E acetate, and online sales of vapor products. The bill also would have limited nicotine concentration, regulated the container and tank size of vapor products, and required manufacturers and distributors to provide a list of all ingredients. I was able to make sure the bill passed out of my committee and off the floor of the Senate, but when it reached the House, unfortunately, it stalled. Since then, we have been encouraged to see the rate of lung infections dropping in recent months. We will continue to monitor the levels of vape use by teens and could draft new legislation if needed
